We have your windows and walls covered - with our great range of vinyl stickers. Sizes from 150 x 150mm to a massive 4,980 x 4,980 and you can cut to almost any shape using our "Custom Shape" option. With such a huge variety of options and applications you won't be stuck for inspiration:

Monomeric Vinyl – A good value, yet long lasting vinyl for use on walls, windows or any other flat surface that you want to adorn. Available in a gloss or a matt finish. Opt for **Gloss** if you have a vivid design and you want sharp, bright colours to stand out. If you are after a more understated look, go for **Matt**.

Transparent Vinyl – Adhesive vinyl, affordable yet lasts for up to 3 years outdoors. We print in CMYK straight on to the surface. This means that the colours will be transparent. If you require any opaque areas or your design contains white, please select **Transparent Vinyl + White Print** from the material dropdown. If the sticker will be placed inside the window and viewed from the outside, then please select **Transparent Vinyl + Mirror Print**. We can also print your design on the same side as the adhesive. To order this option, simply select 'Window sticker'.

One-way Vision – Also known as contra-vision this vinyl is perforated. Suitable for large text and images it lets light in whilst not allowing passers-by to see in from the outside. Use in offices, shop windows, buses or anywhere where light and privacy are paramount.

Add a gloss or matt lamination to increase durability, protect the print. Choose from a matt or gloss UV filter 5 lamination to increase the resistance to fading. We recommend this especially if your vinyls are to be placed outside.

Application Instructions:

All our wall and window vinyls are supplied with a self-adhesive backing for easy application. Ensure your surface is clean and dry prior to application. Simply peel off the backing and it will adhere to your chosen surface. You can use a squeegee to ensure an even finish.
